Nex t®

Next Engineering's mission is to unlock the potential and inspire everyone who works with us, based on its vast market experience, the best national and international talent, and the power of technology and innovation.

We believe that growth is within everyone's reach, and we adapt to any context or challenge. We go beyond limits and boundaries by providing strategic consultancy services tailored to each project and/or client.

We invest in the best human capital, which enables us to make companies better prepared for the future. We achieve this by combining state-of-the-art technology with a team of multidisciplinary professionals whose technical know-how allows us to provide quality solutions.

We question the conventional and position ourselves as a technology consultancy that sees non-conformism as a daily goal. We believe that it is our fluidity that guides knowledge to innovation and allows us to shape the future.

Within the scope of its Integrated Management System policy, **Next Engineering** has established the following guidelines:

QUALITY

Next is committed to continuously improving the organisation to achieve operational excellence in its activities and guarantee a high level of satisfaction with the expectations of its clients and other stakeholders.

In its activities, **Next** organises itself to continuously improve the Integrated Management System, sets goals and undertakes to improve its effectiveness, complying with the applicable legal, normative and regulatory requirements, as well as others to which the company subscribes.

INFORMATION SECURITY

Next considers information to be an essential asset for the fulfilment of its functions. It is committed to promoting and implementing appropriate levels of security to protect both information system resources and the information processed, stored or transmitted by them.

It ensures compliance with applicable legislation, guaranteeing the confidentiality, integrity and availability of information, as well as managing security incidents that may affect it. Through the Integrated Management System, it ensures compliance with regulatory requirements and codes of good practice, to identify, quantify, prioritise and deal with risks and ensures a commitment to continuous improvement.

The commitments undertaken in the Integrated Management Policy involve the entire organisation,

with Management taking responsibility for its communication and implementation, committing itself to acting with a focus on achieving the established goals.

The Management,
